Section 3 -form two equations and solve them simultaneously (Grade 6 to 7)
13. I have two numbers that have a sum of 16 and a difference of 3 . By forming two equations and solving them, find the two numbers.

The two numbers are 9.5 and 6.5
14. A shop sells two different types of marble in bags: red and blue. A bag containing three red marbles and two blue marbles weighs 66 g .
A different bag containing one red marble and four blue marbles weighs 72 g .
Form and solve two equations to show how much does each type of marble weighs?

> Red = 12g; Blue =15g
15. Using the table below find the cost of one apple and one
